PlantMate
Drench
Rootzone Booster WP

1.5kg

Recommended for all growing plants

A WP formulation for application to the root zones of all plants via all systems including conventional dripper, tape, overhead irrigation and boom spray.

Active Ingredients: Proprietary strains of *Trichoderma atroviride* 100 million cfu/g — selected natural strains formulated in the specific colonisation matrix.

INSTRUCTIONS: Ensure the dispensing tank is agitated continuously during application. After applications through micro delivery systems, dripper & tape etc., always flush with clean water. PlantMate Drench may be applied with fertilizers, seaweed extracts and fish-based products.

APPLICATION	RATE	COMMENT
Potatoes and other field grown vegetable crops	750g per hectare	Best results achieved by early application. Apply in furrow at planting (or soon after) and again after emergence. Potatoes - apply again at tuber initiation (early flowering). Apply before irrigation where possible to wash the active ingredient into the rootzone.
Orchards and Vineyards	750g per hectare.	New Plantings: Water PlantMate Drench in at 5g/L at planting and again 4 weeks later. Use PlantMate Granular in the planting hole for best practice. Established vines / trees: Apply 750g/ha from early Spring. Apply 3-4 times per season timed with root flushes.
Nurseries	500g per 100L	Apply every 4 weeks to growing plants in the nursery. Seedling Plugs: Apply 10g/L to cells at seeding. For spray bar application consider PlantMate Greenhouse. Prior to field planting - apply 10g/L prior to release. Compatible with insecticides.
Glasshouse Crops	Hydroponic / NFT systems 500g per 1000L - Apply every 10-14 days	These recommendations apply to all systems including open, closed, re-circulating and run to waste. Suitable for rockwool, pumice, vermiculite and other artificial substrates. Consider PlantMate Greenhouse for easier solubility.
	Organic Media 500g per 5000m ²	Sawdust, peat, coir, bark based media. Apply every 10-14 days.

SAFETY PRECAUTIONS:

Keep out of reach of children. Wear a mask when mixing with water. Store refrigerated but do NOT freeze. Crush the empty sachet and bury in an approved landfill. Do not contaminate the water supply with material or the empty pack.
