PlantMate Foliar

Canopy Health WP

INSTRUCTIONS:

Ensure the mixing tank has been thoroughly washed to remove any chemical residues before mixing PlantMate Foliar with fresh clean water. Always pre-mix PlantMate Foliar by adding the powder to water at the minimum rate of 200g to 10 litres. Mix well and allow to stand for 5 minutes before adding to the dispensing tank, which should contain a maximum of 500 litres.

Ensure the dispensing tank is agitated continuously during application. Do not mix PlantMate Foliar with chemicals. Ensure all liquid is applied on the same day it is mixed into suspension. PlantMate Foliar may be applied with liquid foliar nutrients and organic products such as seaweed extracts and fish based products. PlantMate Foliar should be applied in the late afternoon with a wetter/sticker.
